We are in a Litigation Explosion

Nine out of ten lawsuits in the world are filed in the United States. A new lawsuit is filed every 2 seconds. If you own a business or practice a profession, you have one chance in three of being named a defendant in a lawsuit this year!

Although America has just five percent of the world's population, it has more than 80 percent of the world's lawyers...and it is getting worse. According to the American Bar Association, there are close to 1,600,000 practicing lawyers in America and there are currently more than 100,000 students attending law school. When they graduate, the only way some of them will ever make money is to sue people; even people who don't deserve to be sued. Maybe even you.

Because many of these lawyers work on a contingency fee basis, their clients don't have to invest a dime. And since lawyers receive one-third (or more) of the amount received when they win or settle a lawsuit, they are more than happy to initiate a frivolous suit. In fact, according to the U.S. Chamber of Commerce, more than \$152 billion was paid just to settle frivolous lawsuits last year alone.

In such a litigious society, if you own anything worth having, one of these lawyers will find a way to come after you. You owe it to yourself and your family to at least consider protecting your assets the way former plaintiff's attorney and best-selling author Thomas Adams teaches people to do every day. It's the single best affordable asset protection and financial privacy strategy in existence.

"Nine out of ten lawsuits in the world are filed in the United States. As a lawyer, I have seen innocent people lose everything as a result of a frivolous lawsuit. Many lawyers and financial planners are quick to recommend expensive, complicated trusts and partnerships as asset protection devices. The Secrets of Asset Protection, "Only the Wise Survive", is the first book to describe in easy-to-read terms how anyone can protect their assets with the use of affordable Nevada and offshore corporations. As a plaintiff's lawyer, I can say with certainty that there has never been a better book to explain the use of corporate entities for asset protection."
