WE'VE REDEFINED WALL STREET

Bridgeway clients have the opportunity to reap returns unsurpassed by traditional mainstreet.

Elite Wall Street investors, executive insiders and investment banking firms have always held special assets that have flourished, whereas mainstream investors have had neither the vision nor the knowledge to access these special funds.

Today's savvy investors are looking for investments in private placements, partnerships, and limited liability corporations.

"Brokerage firms have worked hard to convince you that passive asset allocation is the best way to grow your investments...but in today's world, wealth requires that you seek out new opportunities beyond main street brokers"

LIVING the LIFE of YOUR DREAMS

AMERICANS ARE LIVING LONGER IN RETIREMENT THAN EVER BEFORE

The National Commission on Retirement forecasts that the average retirement will increase to 17.4 years.

Yet, at retirement most Americans possess very little in retirement safety, which must be stretched over longer lives. In addition, if inflation continues at its historic pace of 2-3% annually, savings will continue to diminish in purchasing power.

Combine these factors with the underfunding of Social Security and you face a future of growing uncertainty.

SECURE YOUR FUTURE WITH THE SECRETS OF THE WEALTHY

Some of the richest American families have combined three money making concepts to create wealth... compounding interest, tax deferral and investment banking. These secrets, when used in conjunction with Charitable Trusts, Family Foundations and Private Banking have been the cornerstone for acquiring and preserving the wealth of these family dynasties.

You too can secure your financial future alongside the wealthy and enjoy the freedom and satisfaction of a long and prosperous life style.
