Monthly Letter - June / July 2011

An increasing number of clients worried about the drastic decline in the value of the US dollars, the health of the economy, the increasing debt and the possibility of hyper-inflation. The Cayman Island financial firm takes a global view on investing and can provide many solutions to hedge these growing concerns.

Here are just a few investment options available:

Physical Precious Metals: Gold is the traditional "Safe-Haven" asset. Governments & corporation are expanding their use of Gold as a reserve asset and reducing their reliance on the USD. In addition, many investors use Gold as a natural hedge against inflation or USD depreciation. Purchase precious metals, such as Gold, Silver, Platinum and Palladium, and get the actual bar numbers. You can take a margin loan of up to 80% against your other high yielding investments. You win twice.

Multi-Currency Cash Accounts: Clients can have cash accounts in up to 10 major currencies. Clients can also purchase *foreign bonds* to potentially boost returns.

Fixed-term deposits: Attractive interest rates are available for certificates of deposit in the following currencies: GBP, EUR, CAD, & USD.

Equity Inflation Fund: This fund aims to provide strong gains through investments in equities that have fixed pricing power and should benefit from rising prices. Fund denominated in several currencies. Annualized return: 47%

Emerging Currency & Fixed Income Fund: This fund aims to provide capital appreciation through investments in bonds, currencies & their derivatives in emerging Asian, Latin American, Eastern European, Middle Eastern, and African countries. Fund is available in several currencies. Annualized return: 19.7%

Natural Resource Fund: Natural resources are a great way to gain global exposure and diversify a portfolio. With the increase in global energy demand and high margins on oil & gold, this fund is positioned for strong future growth. The fund has historically produced very robust returns through investing in pre-IPO junior resource companies. Fund is available in several currencies. Annualized return: 156%

Get all of these options in one account. For more information on these investments please contact Bridgeway Financial Corporation at their Seattle office.
